

# #switch to LUMIA WITH WP8

## FROM IPHONE

## TO COPY YOUR SMS MESSAGES AND CONTACTS

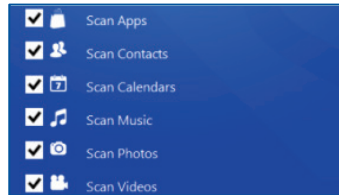

Transfer my Data

1. Enable Bluetooth on your old phone
2. On your new Lumia, launch the **Contacts Transfer** app
3. Follow the **on-screen instructions** to connect to your old phone and copy your contacts

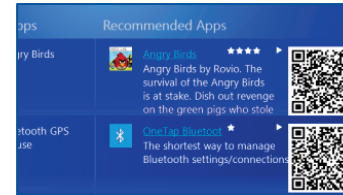

## TO COPY ALL YOUR DATA

FIRST, copy data from your old phone to a computer

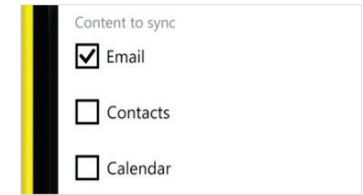

1. Install the free **Welcome Home to Windows Phone** software from [welcomehome.to/nokia](http://welcomehome.to/nokia) to your PC or Mac
2. Launch the software and **connect your old phone** with a USB cable
3. If you have Microsoft Outlook, set iTunes to sync your contacts and calendar with it
4. Check that you have the **sync settings** you want in iTunes and complete a full sync
5. Select the data you want to copy and click next to start scanning files on your old phone

THEN, get your apps and data to your new Lumia

1. The software shows a list of apps found on your old phone
2. Save the list as a pdf. You can later scan a QR code on the list with **Bing Vision** to install/buy the same or a similar app in the Store
3. When the software asks, sign in with your **Microsoft account** to sync your contacts and calendar to the cloud
4. Connect your **new Lumia** to a computer **with a USB cable** and use the computer's file manager to copy your photos, music and videos to the phone memory

FINALLY, sync your cloud accounts

1. On your old phone, **sync all your cloud accounts** (for example Nokia Mail, Gmail and Yahoo) manually to make sure everything is up to date in the cloud
2. On your new Lumia, add the cloud accounts in **settings > e-mail + accounts**
3. In the account settings check that all the information you want is synced

## TIPS AND TRICKS

- For instructions on enabling and troubleshooting Bluetooth, syncing accounts or on syncing data with iTunes, see the user guide for your phone
- If the Welcome Home to Windows Phone software cannot find any matching apps, check the region settings of your computer
- If you don't have Microsoft Outlook on your computer, use Transfer my data and cloud account sync to copy your contacts and calendar
- If you are about to give your old phone away, make sure that you have copied everything you need from your old phone before resetting it to factory settings
- To avoid duplicate contacts or calendar entries, check your cloud account sync settings to make sure that contacts are synced only from one account
- Try [people.live.com](http://people.live.com) for managing your contacts, linking accounts and removing duplicate data
- Remember to copy your camera roll content manually as iTunes does not sync it automatically
- If you are using a shared computer to transfer data from your old phone, make sure you remove all your personal files from the computer after you are finished

# #switch to LUMIA WITH WP8

## FROM BLACKBERRY

## TO COPY YOUR SMS MESSAGES AND CONTACTS

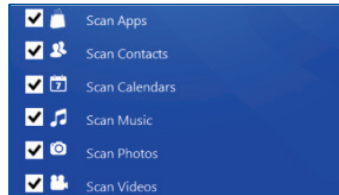

Transfer my Data

1. Enable Bluetooth on your old phone
2. On your new Lumia, launch the **Contacts Transfer** app
3. Follow the **on-screen instructions** to connect to your old phone and copy your contacts

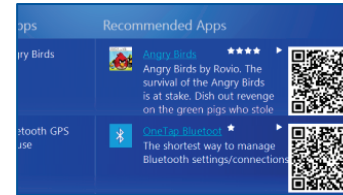

## TO COPY ALL YOUR DATA

FIRST, copy data from your old phone to a computer

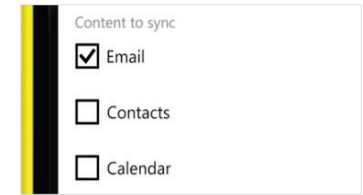

1. Install the free **Welcome Home to Windows Phone** software from [welcomehome.to/nokia](http://welcomehome.to/nokia) to your PC or Mac
2. Launch the software and **connect your old phone** with a USB cable
3. If you have Microsoft Outlook, use the Blackberry desktop software to sync your contacts and calendar
4. Select the data you want to copy and click next to start scanning files on your old phone

THEN, get your apps and data to your new Lumia

1. The software shows a list of apps found on your old phone
2. Save the list as a pdf. You can later scan a QR code on the list with **Bing Vision** to install/buy the same or a similar app in the Store
3. When the software asks, sign in with your **Microsoft account** to sync your contacts and calendar to the cloud
4. Connect your **new Lumia** to a computer **with a USB cable** and use the computer's file manager to copy your photos, music and videos to the phone memory

FINALLY, sync your cloud accounts

1. On your old phone, **sync all your cloud accounts** (for example Nokia Mail, Gmail and Yahoo) manually to make sure everything is up to date in the cloud
2. On your new Lumia, add the cloud accounts in **settings > e-mail + accounts**

2. On your new Lumia, add the cloud accounts in **settings > e-mail + accounts**
3. In the account settings check that all the information you want is synced

## TIPS AND TRICKS

- For instructions on enabling and troubleshooting Bluetooth and mass storage mode or syncing accounts, see the user guide for your Android phone
- If the Welcome Home to Windows Phone software cannot find any matching apps, check the region settings of your computer
- Try [people.live.com](http://people.live.com) for managing your contacts, linking accounts and removing duplicate data
- On some Android versions calendar entries are by default saved to a local calendar and will not be copied. You can recreate upcoming calendar entries conveniently using [outlook.com](http://outlook.com).
- If you are about to give your old phone away, make sure that you have copied everything you need from your old phone before resetting it to factory settings
- To avoid having duplicate contacts or calendar entries, check your cloud accounts sync settings to make sure that contacts are synced to your Lumia only from one account
- If you are using a shared computer to transfer data from your old phone, make sure you remove all your personal files from the computer after you are finished

# #switch to LUMIA WITH WP8

## FROM SYMBIAN

## TO COPY YOUR SMS MESSAGES AND CONTACTS

Transfer my Data

1. Enable Bluetooth on your old phone
2. On your new Lumia, launch the **Contacts Transfer** app
3. Follow the **on-screen instructions** to connect to your old phone and copy your contacts

NOKIA

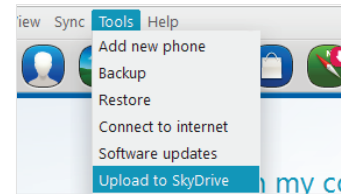

## TO COPY ALL YOUR DATA

FIRST, copy data from your old phone to a computer

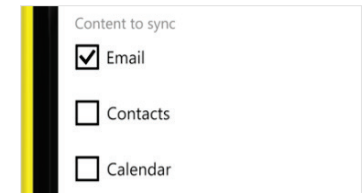

1. Connect your **old phone** to a PC with a USB cable.
2. Check phone sync settings in **Nokia Suite** and copy phone data to your PC. You can download the latest Nokia Suite from [nokia.com/nokiasuite](http://nokia.com/nokiasuite)
3. If you have a Mac, you can use iSync and **Nokia Multimedia Transfer** software (available in [www.nokia.com/mac/mediatransfer/latest-1.4](http://www.nokia.com/mac/mediatransfer/latest-1.4)) to copy data to your computer

THEN, get your apps and data to your new Lumia

1. In Nokia Suite, **select Tools > Upload to SkyDrive** and sign in with your **Microsoft account** to copy your photos, contacts and calendar to the cloud
2. Connect your new Lumia to a computer with a USB cable and use the computer's file manager to copy your photos, music and videos to the phone memory

FINALLY, sync your cloud accounts

1. On your old phone, **sync all your cloud accounts** (for example Nokia Mail, Gmail and Yahoo) manually to make sure everything is up to date in the cloud
2. On your new Lumia, add the cloud accounts in **settings > e-mail + accounts**
3. In the account settings check that all the information you want is synced

## TIPS AND TRICKS

- For instructions on enabling and troubleshooting Bluetooth, syncing accounts or syncing with Nokia Suite, see the user guide for your phone or Nokia Suite Help
- Search the Store to install/buy similar Windows Phone apps you have been using on your old phone
- Nokia Suite supports syncing photos to SkyDrive in JPEG, GIF or PNG format
- Make sure you have the same time zone set on your old phone and in outlook.com, otherwise calendar entries may be copied to start at wrong time
- If you are about to give your old phone away, make sure that you have copied everything you need from your old phone before resetting it to factory settings
- Repeating calendar entries cannot be synced. You can recreate your upcoming calendar entries conveniently using outlook.com.
- To avoid having duplicate contacts or calendar entries, check your cloud accounts sync settings to make sure that contacts are synced to your Lumia only from one account
- Try people.live.com for managing your contacts, linking accounts and removing duplicate data
- If you are using a shared computer to transfer data from your old phone, make sure you remove all your personal files from the computer after you are finished
